Magnetic Portfolio

Arccivo
Chic color and styling make keeping your "in progress" layouts a scrapbook diva's dream. Simply close the album station and the built-in, heavy-duty magnets will hold everything in place on your layout.

▲ Because of the strong magnets inside, keep tote away from computers, cell phones and other electronic devices.

Phrase Maker

These "price tags" can be completely customized with this adorable machine. Change the tag style, ink color and font. It's all in the details—and in your control!

Rub-On Tape

Daisy D's Paper Co.
This is a fabulous idea: realistic-looking stitching completed with the ease of an adhesive runner. Love it!

See how I used this tape runner on page 84. ▲

Oooh La La Layers

TaDa Creative Studios
Get creative with these new "layers"—12" x 12" papers with die-cut shapes cut out, making it easy to add layers of cardstock with extra pop. I'm stocking up on the vellum styles. **ck**

Circle Carousel

Making Memories
You can find a place for everything and have it right at your fingertips with this new carousel. The lazy-Susan feature makes it even more fabulous.
